

COLOUR AND COATINGS

COMPOSITE FIBRE TECHNOLOGIES

WAGNERS

COATING CATEGORIES

Wagners use two different types of coatings; fluoropolymer and high-quality polyurethane. We use a fluoropolymer coating on members that are either in direct sunlight or subject to harsh marine environments, while all other members are coated with the high-quality polyurethane paint.

Why fluoropolymer?

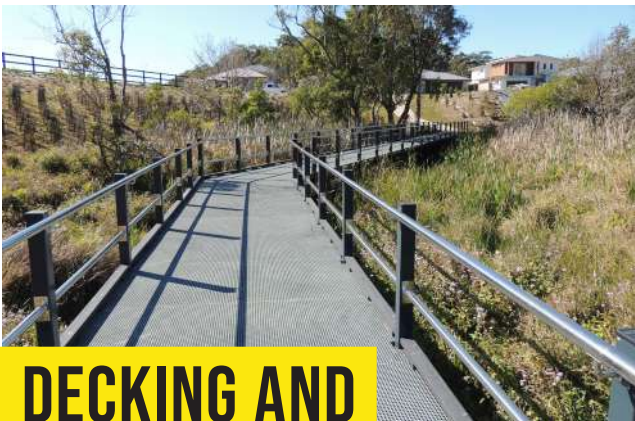

Fluoropolymer has been engineered to resist UV and other weathering effects extremely well with minimal loss of gloss and colour over its life. It comes with an extra long life warranty and at least 40 years of exterior exposure before the first recoat is required.

Why coating rather than resin injected colour?

Although UV inhibitors can be used in the process of making of glass fibre reinforced plastic products, the effectiveness of the inhibitors diminishes quickly with prolonged UV exposure. Wagners found in the Australian conditions nothing works better than ensuring the composite fibre product has an effective coating to protect it from UV degradation.

STRUCTURAL COATINGS

DECKING AND KICKRAILS

During the process of making the decking and the kickrails, Wagners suppliers use a process of injecting the requested colour into its resins to ensure that no edge is left without its colour after trimming.

Though every effort is taken to ensure the colour between panels match, some slight colour variation is to be expected with large orders due to slight batching differences.

BALUSTRADES

Wagners aluminium balustrades are powder coated using the Dulux Duralloy Range that has a 10-year durability and colour warranty. The benefits of Dulux's Duralloy Range is that it has a guaranteed performance on aluminium with good colour retention and a durable hard-wearing finish.

WAGNERS

STRUCTURAL COATING COLOURS

Our colour palette complements any environment the structure is built for with a choice between premium or standard colours to meet the needs of any application.

Custom colours are available upon request. Custom and premium colours may incur price variations.

PREMIUM RANGE | **STANDARD RANGE**

				NEUTRAL GREY N23
			MOSS GREEN G14	LIGHT GREY N35
WHITE N14	IRONBARK X63	SAND Y44	EUCALYPTUS G52	BRIDGE GREY N44
GOLDEN YELLOW Y14	MIDNIGHT BLUE B62	BROWN X54	SLATE G64	DARK GREY N64
MOUNTAIN BLUE T51	BLACK N61	DARK BROWN X65	DARK EARTH X62	CHARCOAL B64

Whilst every effort is made to accurately colour match, variation in colour on the final product may occur.
